# COMPONENTS

## SEIZE THE BEAUTY

Engineered in a moderate 29mm of width and 12.9mm of thickness and processed with electroplating workmanship, POZZ PRO fits comfortably in one hand.

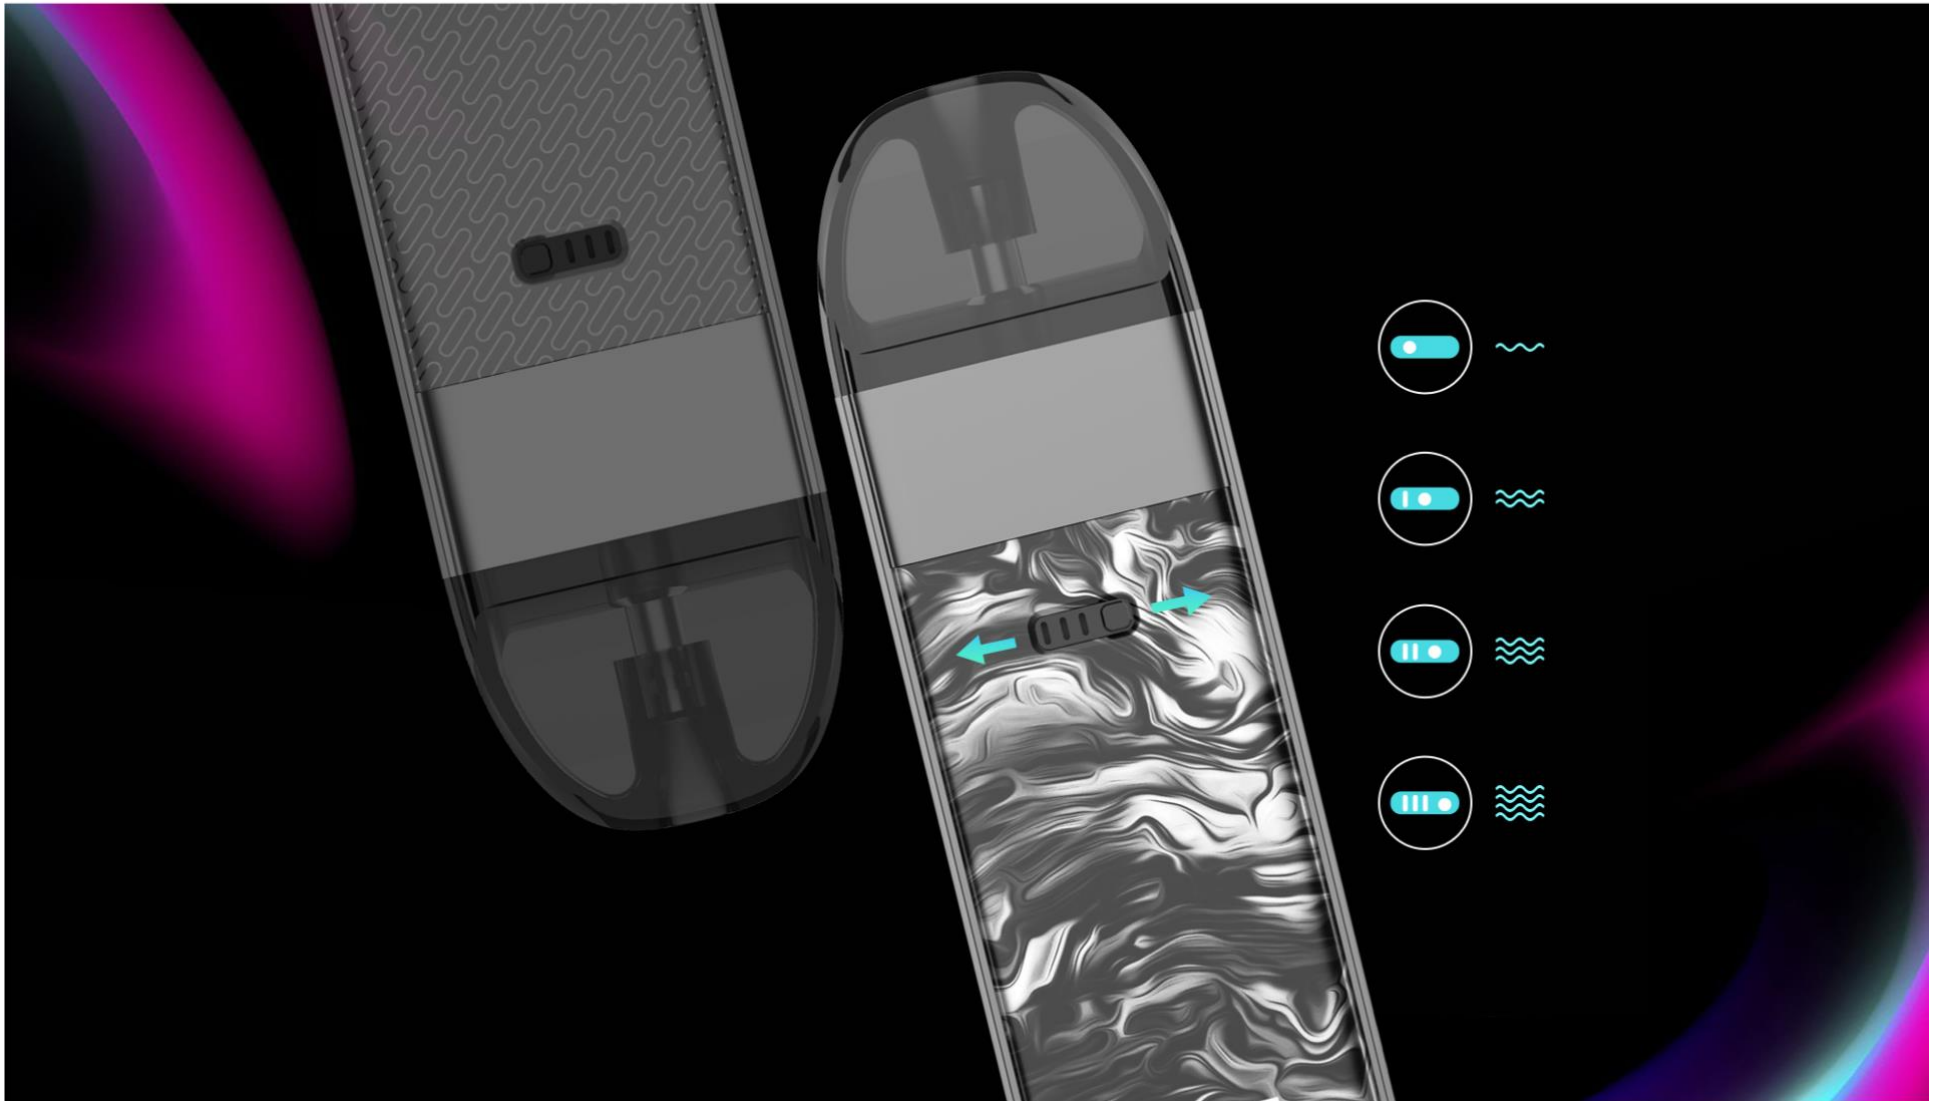

## COMPACT YET DURABLE

The zinc alloy, featuring textured metallics and tested durability, is the right material to create the device, making it as stunning to look at as it is capable to use.

# AIRFLOW IN CONTROL

The slider holds 4 levels of the airflow, moving it to adjust the volume of the airflow, having fun creating your own preferred flavor.

# THE FREEDOM OF STARTING VAPING

The variety of the puffing method doesn't refer to a flashy function but a more user-friendly vaping device.  
Air-activated or button-triggered, lead your vaping way whatever you like.

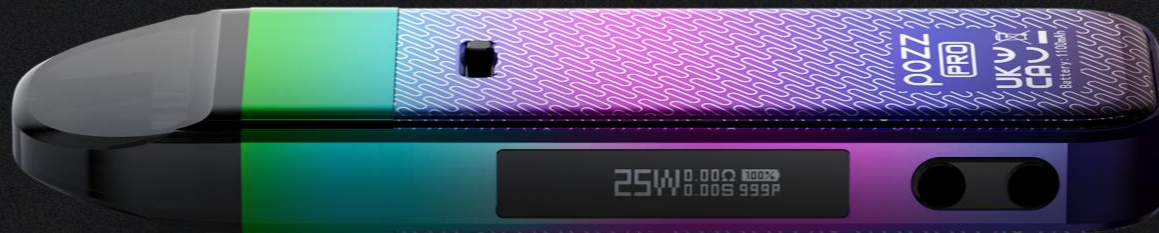

# POWER ADJUSTMENT MAKES THE POWER PERSONALIZED

Freely switch the vaping power within the range of 5W-25W to fit your desire for the strength of the taste.

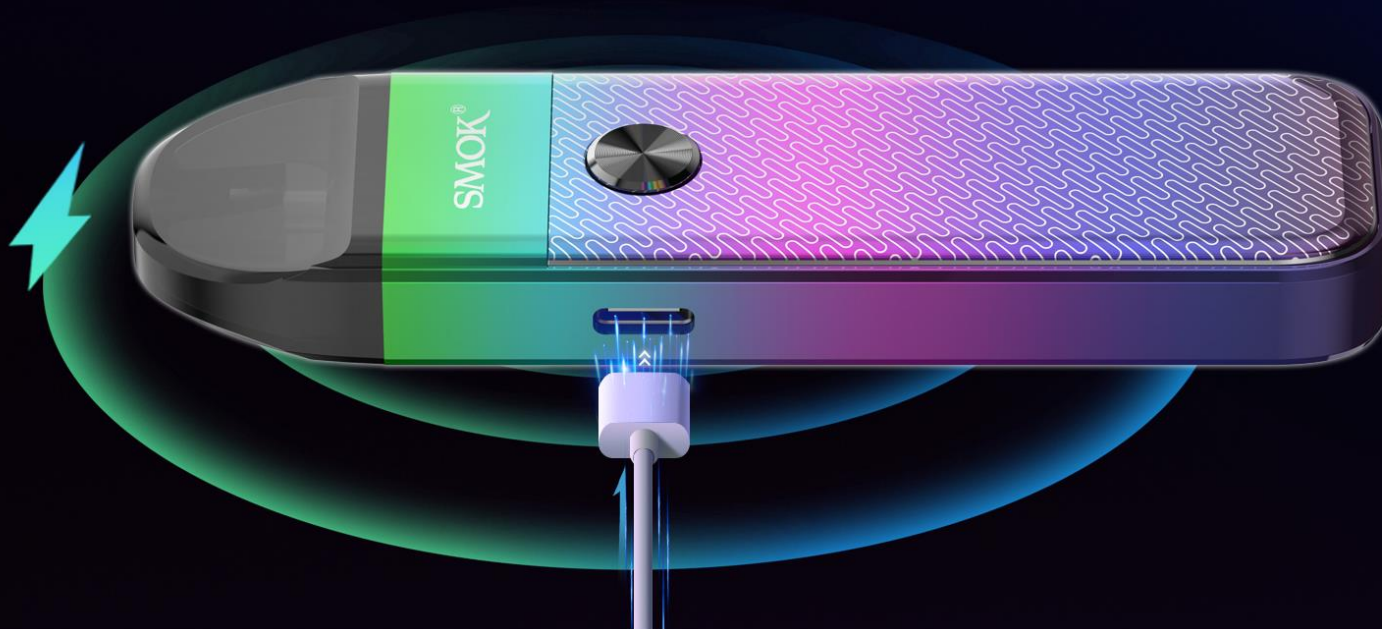

5-25W

# 90MIN CHARGING FOR ALL-DAY VAPING

With a 1100mAh battery inside, POZZ PRO aims at fulfilling your whole-day vaping, and refreshes in an energetic state in 90min via a type-c port.

# PUT MORE TASTY INSIGHTS IN SIGHT

POZZ PRO allows you to take detailed readings of the flavor you are tasting on the tiny 0.69inch OLED display, helping you understand your preference and the device further.

# MOTIVATION FROM START TO FINISH LINE

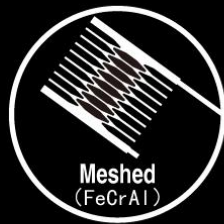

# SAME FORMULA EXPERIENCES DISTINGUISHED

The employed coil insists on the leak-proof technology, with three silicone rings to prevent the liquid from the pod. And the meshed structure enhances the smoothness of the flavor.

**3 silicone rings**  
+∞ leakproof experience

# HOW TO FILL WITH E-LIQUID?

Do not inhale immediately after filling the pod. Let it stand for several minutes to get the cotton completely saturated.

1. Open the slot on the pod by pulling back the rubber plug.
2. Inject up to 2.6ml of e-liquid into the slot and press the rubber plug back carefully and firmly.
3. Firmly push the pod back into the POZZ PRO device.
4. Wait 2-3 minutes before vaping.

**This product contains nicotine  
which is a highly addictive substance**
